RAJAT VARMA

SENIOR SOFTWARE ENGINEER

India | vrajatlink@gmail.com | LinkedIn | GitHub | Portfolio

Senior software engineer at Microsoft, previously Flipkart. Builds backend services and AI agent infrastructure with a focus on correctness, observability and operator control.

EXPERIENCE

Microsoft

Mar 2025 - Present

Senior Software Engineer | Jan 2026 - Present
Software Engineer | Mar 2025 - Jan 2026

- Lead the design of a microservice for agent orchestration at scale, with observability built into its operating model.
- Developed and optimized RAG and context pipelines to improve agent performance and efficiency.
- Built a production search agent; collaborate across teams to improve performance, reliability and user experience.

Flipkart

Jun 2022 - Mar 2025

Software Development Engineer II | Jun 2023 - Mar 2025
Software Development Engineer | Jun 2022 - Jun 2023

- Improved service reliability for Big Billion Days peak traffic, helping sustain events serving millions of requests.
- Maintained and optimized a payment backend under strict latency and correctness constraints.
- Built a RAG pipeline for user data and metrics, improving data observability and investigation of production behavior.

SELECTED PROJECTS

IncidentLab | AI reliability

2026

Built an incident investigation and repair-verification system with cited evidence, human approval, fail-closed policy checks and an independent verifier in a network-disabled Docker sandbox.

React / FastAPI / PostgreSQL / Temporal / OpenTelemetry | Source | Live demo

Agent Workbench | Coding agent evaluation

2026

Built a local-first evaluation lab with frozen task suites, immutable configuration snapshots, isolated Git worktrees and independent graders; retained traces and diffs make regressions inspectable.

Electron / React / FastAPI / SQLite / Codex CLI | Source | Live demo

Juniper | Voice AI

2026

Built a voice receptionist for booking and rescheduling with explicit confirmation, duplicate-safe retries, database constraints against overlapping appointments and durable session recovery.

TypeScript / Python / LiveKit / Fastify / PostgreSQL | Source | Live demo

TECHNICAL SKILLS

Engineering: Python, Go, TypeScript, React, FastAPI, PostgreSQL
Infrastructure: Kubernetes, containers, orchestration, CI/CD, Prometheus, Grafana
AI systems: RAG, agent orchestration, evaluations, LLMOps, sandboxing, guardrails

EDUCATION

BTech, Computer Science & Engineering
Ramaiah Institute of Technology, Bengaluru
